Merlin Croain

Machine Learning Engineer

job@croain.dev Toulouse, France (remote) https://croain.dev linkedin.com/in/merlin-croain
github.com/merlin-croain

Summary

Machine learning engineer by title. In practice, I do a bit of everything.

Experience

Klara Machine Learning Engineer (Remote) May 2024 – Present

- Build product features end to end on an HR platform for frontline workers: Ruby on Rails back end, React front end.
- Lately focused on LLM-based features.

Digital Max Data Lake Architect (Remote) November 2023 – February 2024

- Designed the data lake architecture for a new product, with a focus on energy efficiency.

Mutaero Data Manager Apprentice (Toulouse) September 2021 – September 2023

- Rebuilt and optimized the data infrastructure of the Performance & Quality department.
- Built data pipelines and deployed LSTM models for predictive analytics (Python, TensorFlow, Azure, PostgreSQL).
- Ran training sessions on data usage for the teams.

IRIT Software Developer Intern (Remote) May 2020 – July 2020

- Integrated a planning algorithm into a routing optimization engine: +10% efficiency.
- Built an app that shows the results on a map. Stack: C, Python.

Skills

Programming

Ruby, Python, TypeScript, JavaScript, SQL, Bash

Web

Ruby on Rails, React

AI / ML

LLM integration, PyTorch, TensorFlow, Pandas, NumPy

Infra & data

PostgreSQL, Docker, Linux, Proxmox, Git, GitHub Actions, Azure

Spoken

French (native), English (advanced)

Projects

Homelab

- Proxmox homelab: self-hosted services in containers, reverse proxy, automated updates (Renovate), CI with GitHub Actions.

Education

Toulouse Capitole University (M.Sc. Machine Learning & Big Data, work-study) September 2021 – September 2023

Paul Sabatier University (B.Sc. Computer Science) September 2020 – June 2021

Toulouse Jean Jaurès University (DUT in Computer Science, two-year degree) September 2018 – June 2020
